THE GAZETTE.

FRIDAY EVENING, MAY 10.

AN EXTRAORDINARY CASE of violation of sepulchre has just occurred in one of the French departments at Louvroil, (Nord.)

A workman named Magnan, aged 23, had garden attached. the misfortune, about a month back, to lose his wife, to whom he was greatly attached, due in three equal instalments of six, twelve and a few days after his grief was angmented and eighteen months, to be secured by the bonds by the death of his child. From that moment of the purchaser, bearing interest from the day the husband appeared to have partially lost his reason, and he was continually talking of his ment is to be forfeited, and the land sold at the deceased partner, and expressing the belief that she had only left him for a short time and would soon return. Recently, after spending a short time in a wine shop, where some drink which he took had still further unsettled his mind, he returned home, took a spade, and proceeding to the cemetery, commenced removing the earth from the woman's grave; after some hours' labor he succeeded in bring- | K the body as Magnan had stated. The unfortupate workman spoke to it as if still living, and endeavored to obtain a reply by addressing it in the most endearing terms. Finding it, however, deaf to his entreaties, he allowed the grave; he also filled in the earth and went home to sleep. On the following day, Magnan had no recollection of what took place on the previous evening, but said that he thought he had seen his wife during the night.

I OFFER: Peruvian Guano, of the best quality.
Bolivian Guano. This article comes from the same section as Peruvian, which it closely resembles in texture and appearance. It is much richer in Phosphate, but has less Amonia. For stiff soils or stiff sub-soils it will answer quite as well as Peruvian, and it costs but two thirds

the price of that article.

Mexican Guano, of four grades. Ground Bones. Whitelock's Cerealizer. The high reputation borne by this article as the most effective and reliable crop producer made in the United States, induces me to ask the farmer to test it alongside of any manure he may apply. It contains a large amount of animal matter in a highly concentrated form, which, combined with its soluble bone phosphate of lime, cannot fail to render it very valuable as a fertilizer. Notwithstanding we believe it to be the best super-phosphate in the market, yet, by a process peculiar in its manufacture, whereby the expenses are lessened, we are enabled to sell it very low, with a liberal discount to dealers.
